

NPA in Business with Information Technology (Course Code: G9X0 45)

SCQF Level 5 (24 Credit Points)

Why study NPA in Business with Information Technology?

The NPA in Business with IT (at SCQF Level 5) is perfect if you're interested in getting a solid understanding of how businesses work and how IT plays a huge part in it all. This course is designed to give you the basic knowledge and skills you'll need to succeed in the business and tech world, whether you want to go straight into a job or continue studying further. Whether you're looking to build your future career in business, IT, or both, this course will set you up with the skills you need to take your next step.

What do I need to get in?

Entry is at the discretion of the school, but you would normally be expected to have achieved:

- **N4 Business Management / N4 Administration and IT**

What will I study?

In NPA Business with IT (SCQF Level 5), you'll be assessed through a mix of practical tasks and written assignments. You'll show what you've learned by completing projects that are relevant to real-life business situations, so it's all about applying your skills in a hands-on way.

Your work will be marked by your teachers, and you'll be assessed on how well you understand business concepts and how you use IT tools in different tasks. The course is designed to make sure you gain both the practical skills and knowledge needed for work or further study.

Overall, you'll be graded either pass or fail based on your performance in these assignments, and the course gives you the chance to demonstrate what you can do in both business and IT.
