Broad General Education S1-S3

English

Throughout S2 and S3, you will develop your skills in reading, writing, talking and listening. You will read a wide range of interesting books, plays and poems and will have opportunities to write creatively and persuasively. You will also work with others and develop your listening and talking skills. Our Library programme gives you the opportunity to select books and discuss your views. You will have the opportunity to peer/self-assess work and discuss how you are progressing with your teacher. There are regular reading assessments and all your writing pieces will go towards a folio which will provide evidence of your achievement at the end of each session.

The Literacy skills (Reading, Writing, Talking and Listening) developed in English and Modern Languages will be solidified through the work you complete across the entire S2 and S3 curriculum (i.e. through the research completed in Humanities; through group presentations that form part of the S1 Science course).
