Senior Phase

Maths, English, Art and Design Physics, Design and Manufacture, Graphic Comm, geography or history

My Future

For my future I would like to have a really interesting job which I am passionate about and am able to travel the world with.

During my time at Graeme High I have developed. Drawing skills and how to solve problems creatively. I feel confident in communicating my ideas both verbally and visually.

Choosing my destination

In school I had the support of. My Art and Design teachers and my Careers Advice teacher who were able to keep me up to date with the field of Architecture and what colleges and universities were best to apply for. I Once I found out what grades I needed to get into the course I wanted, I was able to really focus my studies and felt I had real purpose to achieve these grades.

My advice

If you enjoy working creatively, and as a team, Architecture is an area in which there will always be jobs as we are always going to need buildings, so you would be able to combine your creative and technical skills. It does mean you need to stick in at Maths or Physics as well as being creative.
